

KKL-JNF invites friends in Israel and worldwide to join us in creating a better Israel by supporting a project for social and geographic peripheral communities

# KKL-JNF Community Parks

Public open spaces  
for quality of life

# KKL-JNF

## We offer you

the opportunity to take part in a project that will directly affect the quality of life for the people of peripheral communities.

### Be a partner

in making community parks possible for the health and well-being of the residents of peripheral communities throughout the country.

### Be a catalyst for change

by providing green, landscaped public open spaces designed to meet the needs and fit the terrain of each community.

### Bring joy into people's lives

with the sustainable gift of well-developed green spaces necessary for quality leisure time in the open air.

### Be proud for making these projects possible

You will receive an impressive form of on-site recognition for your part in facilitating the creation of KKL-JNF Community Parks. These parks will be appreciated and enjoyed by countless children and adults for years to come.

◆ **KKL-JNF is developing public open spaces** throughout Israel's social and demographic periphery with the vision of transforming them into green, inviting, accessible and safe parks, while preserving their natural assets and the environment.

◆ **Community Parks Create Opportunities**  
KKL-JNF peripheral community parks, accessible to people with disabilities and close to home, will enhance individual and community health. The correlation between proximity to green open spaces and well-being has been supported by numerous studies, indicating reduced stress and improved cognitive performance, among other benefits. For children, particularly those in cities, community parks provide an ideal environment for outdoor play, essential for youngsters' healthy development. For adults, they provide an inviting venue for social and community interaction. Moreover, community parks provide green lungs, improve urban landscapes and contribute to creating a healthy environment.

## ◆ **Community Park components** are KKL-JNF

branded and appropriately suited to park size.

Among the components are

- \*Playground equipment
- \*Picnic tables
- \*Seating benches
- \*Drinking fountains with taps
- \*Shade structures
- \*Fitness equipment
- \*Light fixtures
- \*Paving
- \*Rubber surfaces
- \*Landscape development

## WHY KKL-JNF?

- ◆ KKL-JNF has the expertise and decades of experience in landscape development throughout the country. Each greening project is implemented according to the needs of the respective communities.
- ◆ Developing community parks is an integral part of the ISRAEL 2040 program to strengthen the periphery and ensure quality of life for its residents.
- ◆ By developing community parks KKL-JNF is implementing three of the UN's 17 Sustainable Development Goals (SDGs):

Ensuring healthy lives and promoting well-being for all at all ages.

Reducing inequality between the central and peripheral districts.

Providing sustainable living environments.
